MACROAREA OF ENGINEERING

SELECTION AND EVALUATION OF APPLICATIONS

PLEASE NOTE: the application has to be fulfilled online on the following website:

http://mobint.uniroma2.it/erasmus/candidatura/Default.aspx

After completing the application, it must be validated (closed) by the due date fixed on the announcement (bando) of the University, otherwise it will be considered null.

If an application proves to be false, not compliant or incomplete it shall be considered invalid. The students can make an appointment with Mrs. Rita Ricci calling the phone number 06-72597256 or writing an email to **ricci@ing.uniroma2.it** if they have any doubts or need clarifications.

1. **Requirements and instructions for the application**

Students who are enrolled in a bachelor course, master's degree, master's degree in one cycle, Ph.D. and in possession of the requisites indicated in the 2021-2022 Erasmus+ announcement of the University can apply to the Erasmus+ program.
In particular:
   a) For the purposes of the ranking, as far as students enrolled in the <u>first year</u> of the three-year bachelor degree are concerned, the exams taken before the end of the first semester (winter session) will be considered. If the exams taken are not registered on Delphi, they can still be added in the appropriate field specifying the denomination of the exam, marks and credits and attaching a digital scan of the university booklet in the appropriate field of upload.
   No applications from students enrolled in the first year of three-year degree will be considered valid if, at the end of the first semester exam session, at least 6 credits have not been achieved.
   b) Students transferred from other universities must enter the exams taken in the appropriate field, adding the examination name, voting and relative credits and attaching a digital scan of the official certification stating the passing of those exams;
   c) As far as students who have obtained a bachelor degree abroad are concerned, the average will be calculated by converting the degree grade into thirtieths;
   d) The PhD students will have to deliver the hard copy version of the application to the Erasmus+ Engineering office if the application cannot be submitted online;

e) Language certificates, certifications and linguistic self-certifications must be attached by uploading the related files.

2. Evaluation criteria for ranking list creation and candidates' selection

Evaluated elements are listed below:

- Weighted mean score: obtained considering the number of the credits of all exams passed and registered on Delphi within December 31st, 2020.
- Productivity: the ratio between the credits earned and the number of years passed since the year of enrollment to the Bachelor's Degree Course.

Exams passed during the Bachelor's and the Master's Degree Courses shall be evaluated together, without any distinction. Bachelor's Degree final mark shall not be evaluated. The number of full marks (30 e lode) obtained shall be considered only in the case of an equal score in the final pass-list. All courses where the marking system is not expressed in thirtieths shall be excluded from evaluation.

Similar criteria based on merit and productivity evaluation shall be applied to applications made by students from abroad.

The final pass-list shall be divided by Degree Course.

Grants shall be assigned separately by Degree Course (possible combination of similar Degree Courses shall be communicated), and choice of destination shall be made by candidates by respecting the pass-list order of each Degree Course (provided that requirements of each destination are met, both as regards language skills and level of study: PhD students, students who are preparing their graduation thesis, etc.).

As regards the following grants: École Nationale des Ponts et Chaussées, Ensta and Marsiglia (Civil Engineering), Eindhoven (Engineering & Management), Lisbon, Ensta and Marsiglia (Medical Engineering), Haute École Specialiseé de Suisse Occidentale e Haute École d'Ingegnerie et Gestion du Canton de Vaud (Energy Engineering and Medical Engineering), Imperial College London (Control System Engineering), Monaco (Mechanical and Energetic Engineering, Engineering sciences), final assignation is of exclusive competence of the Erasmus+ Coordinator in charge of the agreement. Grants may not be assigned if the Coordinator decides that requirements for the specific destination are not met. To this regard, students interested in the above-mentioned destinations are suggested to refer to the Erasmus+ Coordinator in charge of the agreement beforehand.

3. Language skills required

As regards language skills required for the different destinations, the grant can expect a defined level of certified linguistic knowledge.

In fact, the program is based on agreements between the home University and the receiving University, which, in most cases, expect a specific level of language skill (A1, A2, B1, B2, C1, C2). On the basis of the bilateral agreements, the hosting University could reject a student that is not adequately prepared from a linguistic point of view, even after the assignment of the grant.

Therefore, the grants will be assigned **with priority given** to the students that already have the requested language certification/declaration and have attached it to the application; secondly priority will thereafter be given to the students that will obtain the certificate after the announcement closing date but before the grants' assignations. Thirdly priority will be given to students that still have to achieve the necessary certification, but only for leaving in the second semester. In this case, the assignment will be subject to reserve, that is revocable from the Erasmus+ Office if the certification required is not achieved within a deadline decided by the Erasmus+ Office.

If the student cannot produce the necessary documents of linguistic knowledge within the deadline or if the documents prove to be not adequate or false, it will lead to the loss of the assigned grant which will then be assigned to the next candidate in the ranking.

The agreement might accept a linguistic skill that is declared by an Institute and not necessarily certified.

Whereas the agreement requests certified linguistic skills the certification (mandatory) has to be released by one of the Institutes indicated below:

English language:

- ➢ TOEFL (Test of English as a Foreign Language)
- ➢ ESOL (English for Speakers of Other Languages – University of Cambridge)
- ➢ ESOL (English for Speakers of Other Languages – University of Pitman)
- ➢ IELTS (International English Language Testing System – University of Cambridge)
- ➢ ISE (Integrated Skills in English – Trinity College London)
- ➢ LCCIEB (London Chamber of Commerce & Industry Examinations Board)

French language:

- ➢ DELF (Diplôme d' etudes en langue française – Alliance Française)
- ➢ DALF (Diplòme approfondit de langue française – Alliance Française)

German language:

- ➢ ZD (Zertificat Deutsh – Goethe Institut/ OSD)
- ➢ ZDfB (Zertificat Deutsh fürden Beruf – Goethe Institut/ OSD)
- ➢ ZMP (Zentrale Mittelstufenprüfung – Goethe Insitut/ OSD)
- ➢ ZOP (Zentrale Oberstufenprüfung – Goethe Institut/OSD)

Spanish language:

- ➢ DELE (Diplomas de Español como Lengua Extranjera)

A self-certification from the candidate in which the student declares to be a native speaker of the language will be accepted after proper examination (it will be assigned the C2 level). The students that attend classes in English language in this Macroarea will be assigned the B2 level (English).

The stay in a foreign country, certified or self-certified, of at least 3 months for study or work purposes (for example, *Erasmus+, Traineeship, Overseas,* or other mobility projects) for students enrolled at Tor Vergata University will be accepted after examination and they will achieve the B2 level, unless they achieved more for the linguistic on line support (OLS) exam. For all the other students, it is necessary to possess an official certificate of attendance at one of the projects above mentioned.

For equivalences between the University's linguistic skills and the declaration's levels based on the QCER, refer to what is said by the Academic Centre Language (CLA):

http://cla.uniroma2.it/idoneita-linguistica/che-cose/

An important innovation introduced in the Program is that Erasmus+ gives the opportunity to the attendees to develop their language skills before and during the mobility abroad. A European service of Online Language Support (OLS) was launched in 2016. This Program gives to the attendees of the mobility program the chance to evaluate their knowledge of the language they are going to use abroad, as well as to attend a free online course to develop the skills. Furthermore, students interested in participating in the Erasmus+ program can attend classes potentially organized by CLA.

The linguistic knowledge level will be assigned by the Commission based entirely on the documentation attached to the application. It is highly recommended that the student attaches all the documents in his/her possession.

4. Pass-lists publication, grants assignation and signature of contracts

Final pass-lists shall be divided by Degree Course and published on the website **http://mobint.uniroma2.it/erasmus**.

Students should personally check pass-list publication. <u>No written or phone communications will be made to students</u>. On-line publication of pass-lists have legal value and constitute an official notice for all selected candidates.

After the rankings will be published online, the procedures for the grants assignation will also be published on the website **http://mobint.uniroma2.it/erasmus** . The Erasmus+ scholarships will be awarded by the Commission appointed by the Rector.

Students are required to inform themselves about the educational offer of each partner University of their own interest (courses offered during the semester, etc.) by consulting the website **before the choice of destination.**

Appeals: Appeals should be signed and submitted on unstamped paper (no tax stamps are necessary). Reasons for the appeal should be clearly expressed. Appeals shall be submitted to the Engineering Erasmus+ Office – Mrs Rita Ricci – after making an appointment by mail **ricci@ing.uniroma2.it** or by phone 06-72597256 **within five days of the publication of the pass list on-line.**

For students selected for the Erasmus+ grant who after signing the contract do not leave for the mobility period and do not timely submit their formal renunciation for serious reasons, what is written in University announcement will be applied. If a waiver is received in time for a possible reassignment, the successive candidate in the ranking list will be given the scholarship assignment, if in possession of the required requisites.

Students selected for the grant shall fill the *Learning Agreement* and it has to be transmitted <u>to the host University</u> (partner in the Erasmus+ agreement). Submission of the Learning Agreement shall be made on time in order to respect deadlines set by the host University. The procedures will be communicated on the website **http://mobint.uniroma2.it/erasmus**

5. Disbursement of the scholarship and exams passed abroad

In order to obtain the scholarship, the student attending abroad shall achieve a minimum of credits as specified in the University announcement.
In order to set up the "package recognition" as explicated in the University announcement the student must keep in mind the following indications:

a. It is essential that the student obtains at least 2/3 of the ECTS-CFUs of the corresponding discipline at the foreign University (examples: 8 ECTS-CFU for 12 ECTS-CFU). The remaining credits must be obtained from the foreign University in disciplines considered similar to the scientific-disciplinary sector of the discipline in question, or in subjects that are relevant to the specific discipline. Additional program integrations or tests are no longer allowed on site, whether written, oral or practical.
In the event that this is not possible, the student who only achieves 2/3 (or more) in the corresponding discipline of the ECTS-CFU provided for in Rome Tor Vergata, but not the whole amount, will have to follow the indications that each single course (as communicated by the Delegate) establishes for the achievement of credits in disciplines similar to that indicated on the Learning Agreement in order to complete the missing credits.
In order to calculate the ECTS-CFUs, in the foreign and Italian "packages" other activities different from the exams (course attendance, laboratory, internships, language courses and all that ECTS-CFU allowed from the study courses) with any expected credits can also be included, as long as they have been agreed before departure and are indicated in the learning agreement.
b. Within the "package" mobility it is possible to carry out bibliographic research aimed at drafting the bachelor / master degree thesis for all students who have completed the exams required by their study plan.
c. The procedure for the recognition of exams taken abroad is carried out in the context of the degree course in which the application is received. For this purpose, the following procedure

is suggested:
- Consult the website of the host University where the scholarship was awarded;
- Download the syllabus of the courses that you intend to attend and have them approved, or confirmed, through the appropriate form by the Coordinator of your degree course, who will then coordinate with the Delegated Professors;
- The student is free to request further recognition of equivalences during the Erasmus + scholarship at the partner University, as long as the request is put to the Coordinator of the degree course, or to the Delegate Professor, by e-mail. A link should be attached of the course which requires recognition, with indication of the program, of the number of credits, and of the hours of attendance in the classroom.

d. In order to validate the exams taken or other formative experiences carried out abroad in the Erasmus+ Program, the following is noted:
- To apply for the recognition of the study period abroad in the framework of the Erasmus+ Program, students must obtain authorisation (nullaosta) from the Erasmus+ University office. This authorization will be issued by the said Office when the student has regularized his administrative position.
- It should be noted that, as a rule, certificates and declarations related to exams taken may require significant technical transmission time. It is therefore preferable, if the Erasmus+ coordinator of the partner University allows it, to ask for a further certification of the exams taken, or alternatively, a copy of the certification authenticated with the University's registered stamp. If the delay in the transmission of the certificates compromises the participation in a graduation session or the assignment of other scholarships or other rights, it is advisable to communicate these needs in good time to Mrs Rita Ricci who, in turn, will demonstrate these urgencies to the Offices set up at the partner Universities.
- The "packages" of the exams achieved abroad are formally submitted to the interested Degree course approval and forwarded directly to the students' Secretary of the Engineering Macroarea, that sees to the registration of the exams.

Please note: This English version of the call is made only for publicity purposes. For enforcing the call, resolving any dispute and for all legal purposes only the Italian version is valid.
